I use a Core2 Duo running Lion in a dual monitor setup and the only issue I've seen is that the fonts don't look right on both screens. If I change the background color, the text on the taskbar changes as well, and is also all messed up on both screens. ------ zmmmmm The desktop works fine for me with Intel integrated graphics. I'm running Kubuntu. Q: How to detect when a set of data triggers a Google Event? I've got this data set, which I use as an alarm. There is a five minute delay between the data set and the Google Event. This is the data set: click: data: Problem: While the
