The forecasted focus on low-volatility, high-yield investments became the norm in the aftermath of the 2008 financial crisis. It's only now, as market liquidity has improved and the S&P 500 ratio spread - a measure of market beta - has shrunk, that we're seeing some of these "risk-on" trades unwind and investors' portfolios start to look more like they once did. One of the best example of this is the market's overnight flirtation with negative interest rates. It's time to rethink what you're watching out for The story of the last month can be summed up as investors becoming increasingly aware that the narrative of the past decade was for low volatility and high yields. It's time to rethink what you're watching out for, and that probably means re
